Chief Operating Officer Programme – Global Supply Chain Risk Management Expert

Business Background

1. Spin has been invited to develop a state of the art Chief Operating Officer Programme for one of the most famous learning institutions in Latin America
2. Our client, the Programme Director, invited Spin to contribute with the Global Supply Chain Risk Management pillar of the programme
3. The programme has been attended by High Profiles students how typically were at C-Level at their respective organization (or aspiring to become very soon C-Levels)

How Spin Consulting Professionals Helped

1. The programme has been delivered over a holistic learning journey that involved a preparation phase, a residential phase and a post-residential phase. Aligned with the Programme Director, Spin led all elements of the development and delivery of the programme
2. 3 key pillars formed the programme:
 1. Theoretical frameworks on Risk Management
 2. Real Life Examples from the Industry
 3. Applied Learning – how to enable participants to embed Global Supply Chain Risk Management back at their companies / organizations
3. Given the importance of the subject in the current world, this pillar has been delivered as the last of the overall 4 pillars programme, and in addition to delivery the contents on Risk Management, it also had the responsibility to wrap-up the overall COO programme together, incorporating aspects such as:
 1. Total Cost of Ownership
 2. Total Value of Ownership
 3. Total Risk of Ownership

Achievements

1. The Global Supply Chain Risk Management Expert pillar has been highly evaluated by the participants and considered the best pillar of the programme
2. Spin has been invited to engage with one of the participants in an project to support the client in the implementation of selected opportunities through a consulting programme
3. The programme continues to be an integral part of the COO programme and Spin is considered a SME (Subject Matter Expert) in the learning institution.
